PROFESSIONAL SUMMARY

QA Engineer with 1.5+ years in manual testing, API validation, and ERP system testing across e-commerce, SaaS, accounting, and agro-tech domains. Skilled in defect lifecycle management, REST API testing (Postman), SQL-based data verification, and client-facing UAT. Transitioning into test automation with Python, Selenium WebDriver, and pytest.

TECHNICAL SKILLS

Manual Testing	Functional, regression, smoke, sanity, exploratory, UAT, integration, end-to-end testing
API Testing	REST API validation with Postman request/response verification, authentication flows, status codes, payload checks
Database	Basic SQL for data validation, integrity checks, and cross-module data verification
Automation	Python with Selenium (actively learning); Apache JMeter for basic performance testing
Bug Tracking	Jira defect logging, triage, sprint tracking, release management
Other Tools	Git for version control · Basic HTML & CSS · Agile/Scrum participation

WORK EXPERIENCE

QA Engineer — Nipuna Prabidhik Sewa, Pokhara

Sep 2024 – Present

- Performed manual and API testing across ERP and e-commerce modules each sprint through release.
- Validated REST APIs in Postman and ran SQL queries for data integrity; logged all defects in Jira.
- Led client UAT sessions, collected feedback, and confirmed acceptance criteria before release.
- Coordinated with developers to reproduce issues, verify fixes, and coordinate timely, stable releases.
- Mentored junior testers, reviewed test cases, and maintained QA standards across all project phases.

Computer Instructor — Creative Education Foundation Pvt. Ltd.

Apr 2024 – Dec 2024

- Designed and delivered short-term courses on computer fundamentals, MS Office, and basic programming for post-SEE students on a part-time basis.

Computer Science Teacher — Suryodaya English Boarding School

Apr 2019 – Apr 2024

- Taught computer science and programming fundamentals to secondary-level students; designed interactive sessions and projects to build analytical thinking.

PROJECTS TESTED — ERP SYSTEM

Accounting Application	Tested ledger entries, journal vouchers, expense tracking, and financial reporting modules for calculation accuracy, data integrity, and workflow correctness
E-Commerce Website & App	Validated complete cart, checkout, and payment flows across web and mobile; tested UI consistency, edge cases, and system behavior under varied conditions
SaaS ERP Platform	Tested multi-role admin features including user onboarding, dashboards, and automated workflows; identified usability gaps that improved operational efficiency
Agro Crop Management App	Tested crop task scheduling, farmer-to-expert interaction flows, push notifications, and real-time data synchronization between mobile app and backend systems

EDUCATION

Bachelor of Engineering (Computer Engineering)

Pokhara Engineering College, 2022

STRENGTHS

Detail-Oriented · Strong Analytical Thinking · Clear Communicator · Fast Learner · Team Player · Client-Facing Experience
